## **DETAILED ACTION**

The examiner of your application has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Group Art Unit 1652, Examiner Richard Hutson Ph.D.

Applicant's cancellation of claims 1-16, amendment of claims 17-31 and the addition of new claims 32-47, in the paper of 10/6/2008, is acknowledged. Claims 17-47 are pending and at issue.

## Election/Restrictions

Applicant's previous election with traverse of Group III (claims 17-26, 28-30, 32-47) drawn to a method to prevent or reduce haze in a beverage using a praline or hydroxyl-proline specific endoprotease, in the reply filed on 10/6/2008, is acknowledged.

Applicants traverse the restriction requirement on the basis that examination of all pending claims does not constitute a serious burden, even thought the different inventions may be separately patentable.

Applicant's traversal is acknowledged, although it is not found persuasive on the basis that the previous restriction requirement was based upon a lack of unity of invention as under PCT Rule 13.1.

As previously stated, the technical feature linking the previous groups I-IX, haze preventing proline endoprotease, does not constitute a "special technical feature" as defined by PCT Rule 13.2, because it does not claim a feature which defines a contribution over the prior art as haze preventing proline endoprotease is

Art Unit: 1652

taught thorough US2004/0241791. Further applicants have canceled a majority of the

claims to the non-elected groups.

Upon further consideration, further restriction is required under 35 U.S.C. 121

and 372.

This application contains claims directed to more than one species of the generic

invention. These species are deemed to lack unity of invention because they are not so

linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

**Species Group 1:** 

Those auxiliary enzymes selected from:

A) tripeptidylpeptidase,

B) carboxypeptidase and

C) peptidyl-dipeptidase;

**Species Group 2:** 

A') a method to prevent or reduce haze in a beverage, wherein said beverage is

beer.

B') a method to prevent or reduce haze in a beverage, wherein said beverage is

wine.

C') a method to prevent or reduce haze in a beverage, wherein said beverage is

fruit juice.

Application/Control Number: 10/517,220 Page 4

Art Unit: 1652

Applicant is required, in reply to this action, to elect a **single species from A)** through C) and a single species from A') through C') above, to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The following claim(s) are generic: 17, 18, 23-26, 39-47

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The species corresponding to each of the different auxiliary enzymes and the different methods of preventing or reducing haze in a beverage selected from compositions of beer, wine and fruit juice do not share a special technical feature. It continues that US2004/0241791 teach methods comprising adding a proline-specific endoprotease to a beverage and thus, the shared technical feature of the groups is not a "special technical feature", unity of invention between the groups does not exist.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Richard G. Hutson whose telephone number is 571-272-0930. The examiner can normally be reached on M-F, 7:00-4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nashaat T. Nashed can be reached on 571-272-0934. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
